Experience

ENTERPRISE ARCHITECT CIOX HEALTH, LLC – 2019-2023

- Defined a target cloud architecture and led design though five product migrations to Azure.
- Chief architect and Product Owner for a cloud-based document repository for medical records and other documents, designing for resiliency and performance.
- Built app roadmap framework in concert with Product Management.
- Led app rationalization process over my tenure, resulting in the retirement of 22 legacy apps.
- Provided leadership for four app modernization projects.
- Established and led our Architecture Review Board.

SR ARCHITECT, MERGERS & ACQUISITIONS TRANSUNION – 2015-2019

- Leader responsible for due diligence, program management, and integration of five acquired companies, including app re-architecture, security remediation, and moving apps to the TransUnion environment.
- Worked with business stakeholders and various internal groups to successfully integrate organizations, apps, and customers into TransUnion.

SENIOR ADVISOR, IT BUSINESS ANALYSIS TRANSUNION – 2013-2015

- Acted as liaison between business groups with product ideas and the Global Technology group.
- Designed solutions to fulfill business needs, aligned with TransUnion's enterprise architecture goals.
- Working with development groups, provided estimates based on those designs to assist with business planning and business case development.
- Acted as Chief Architect of Quote Exchange, a property/casualty insurance product aimed at allowing

customers to compare rates with several insurance carriers.

- Conversant with the sales and product management teams, and yet crafted innovative solutions that met our architecture goals.

MANAGER, PRODUCT ARCHITECTURE TRANSUNION – 2011-2013

- Led technical architects responsible for Decisioning product application design and direction.
- Implemented processes to ensure fidelity with reference architectures as well as providing feedback to product management teams.
- Led architecture review for new product features, ensuring congruence with technical direction and vision.

PRODUCT DEVELOPMENT CONSULTANT TRANSUNION – 2006-2011

- Program Manager for the EnVision decisioning product, responsible for multiple release cycles from inception to deployment, managing development and QA team backlogs to ensure quality deliveries on time and within budget.
- Led in a product management capacity between sales and product development groups for new product features and direction, from requirements to functional specification feeding into the software lifecycle.
- Reviewed vendor data solutions to match requirements. Responsible for ensuring compliance with applicable regulations such as GLBA and FCRA.
